ADVISORY COMMITTEE ON FOREIGN LANGUAGE PUBLICATIONS

PROPOSAL FOR THE ESTABLISHMENT OF AN INVENTORY OF

LEXICAL MATERIALS (DICTIONARIES AND GRAMMARS)

1. In an effort to suggest the most practical means of conducting an inventory of lexical materials as proposed in IAC-D-66, it is recommended that the following procedure be agreed.

2. On the basis of the attached evidence of interest by language (Tab A), there is set forth a proposed priority for conducting an inventory of lexical materials in foreign languages, to which the Agencies are asked to agree (Tab B).

3. CIA Library will, as a service to the community, produce as rapidly as possible, in the order of language listed or as agreed, a complete listing of these materials in all functional fields known or available to it. Tab C is a sample entry to be used for the inventory of Chinese dictionaries. Unless there are objections, the CIA Library will use this pattern for carrying out this assignment.

4. Upon conclusion of the inventory in a specific language, it will be published in draft to the Agencies, who will be asked to indicate any additional titles known to them (including their own establishments). It is proposed that each Agency, at its discretion, query its own establishment, whether at home or abroad.

5. A card catalog of the lexical materials identified and located will be maintained by the CIA Library to provide reference service to interested Agencies by author, title, language and subject.

6. It is proposed that further handling of this matter be referred to the reference submitted committee.
